

Public Health Emergency Preparedness Training and Educational Materials Development

Project Title	Public Health Emergency Preparedness Training and Educational Materials Development
Project Summary	As the nation's health protection agency, CDC saves lives and protects people from health threats. Join a CDC team that develops interactive, activity-based trainings and other educational materials to support state and local public health preparedness planning and response efforts.
Country	United States

Project Description

We are looking for creative, detail-oriented individuals to help develop engaging, instructionally-sound materials for enhancing in-person and virtual educational experiences. An ideal candidate uses strong interpersonal, written, and visual communication skills to bring together text, images, video and audio to communicate and educate state and local preparedness partners.

Required Skills or Interests

Skill(s)

Design thinking

Editing and proofreading

Educational design

Graphic design

Writing

Additional Information

CDC's Division of State and Local Readiness manages the Public Health Emergency Preparedness (PHEP) cooperative agreement, which reinforces preparedness activities nationwide in state, local, and territorial public

health departments. Please visit our website at <https://www.cdc.gov/cpr/readiness/index.htm>.
